

## EasyLine SIP-2-GSM Interface

### Economy Gateway for savings from fixed to mobile

The EasyLine is a perfect solution for all companies who wish to save on their fixed to mobile expenses. The EasyLine GSM-Gateway can be connected to any IP-PBX supporting the SIP-protocol. As GSM-calls from the IP-PBX will be handled by the EasyLine in stead of the fixed network, savings of up to 80% off your fixed to mobile expenses are possible.

The product is small in size (desktop format) and is equipped with 2 quad band GSM-engines. It is built according to the highest European quality standards and supports the ECO GSM Technology. The EasyLine has been tested with all major IP-PBX manufacturers so that a fast deployment can be guaranteed.

SIP Peer, SIP client, SIP server

ECO GSM Technology

Easy configuration & installation

Fast ROI
